

# Nicolás Posa — Full Stack Developer

Buenos Aires, Argentina

✉ nicoposa57@gmail.com • 🌐 nicoposa.com • in nicolasposa • 🔄 Nicoposa1

## Profile

---

Proven experience in **fintech and banking environments**, contributing to mission-critical financial systems and secure user flows. Experienced across the full Software Development Life Cycle, including system design, backend development, frontend architecture, cloud deployments, and performance optimization.

Background in mobile development with React Native, providing a strong cross-platform perspective when designing scalable digital products.

## Professional Experience

---

### Fiserv (via BP4)

Senior Full Stack Developer

Nov 2025–Present

- Design and development of enterprise financial applications using **React + TypeScript** and backend services in **Java**.
- Development of scalable UI architectures and reusable component systems.
- Integration and design of **RESTful APIs** ensuring performance and security compliance.
- Participation in technical design, code reviews, and production deployments.
- Ensuring reliability and scalability within a highly regulated fintech ecosystem.

### Banco Comafi (via Boreal IT)

Software Developer

Feb 2025–Nov 2025

- Development of secure banking solutions including mobile and backend components.
- Built secure user flows and high-performance interfaces using React Native.
- Implemented backend services and business logic using **Java**.
- Collaborated with cross-functional teams to deliver financial features used by thousands of users.

### Innovasoft

Software Developer

Feb 2023–Feb 2025

- Led development of cross-platform applications extending a web platform ecosystem.
- Built mobile applications and contributed to backend integrations and system architecture decisions.
- Supported applications built with Flutter, Java, and Objective-C.
- Managed deployments and ensured performance across platforms.

### Vippinn

Mobile Developer

Aug 2022–Feb 2023

- Developed a location-aware tourism application using BLE beacon technology.
- Built cross-platform apps with React Native and integrated real-time location data.
- Collaborated on architecture decisions and performance improvements.

### CoderHouse

React Native Tutor

Jun 2021–Jan 2023

- Mentored students in mobile and JavaScript development.
- Reviewed projects and provided technical guidance.
- Created educational materials and technical exercises.

## Education

---

### Instituto Superior Pascal

Software Development Technician Degree

Buenos Aires, Argentina

2022–2025

**Continuous Learning:** Courses and workshops in AI, cloud computing, mobile development, and modern web technologies.

## Personal Projects

---

### **Numerala**

**Remote**

*Full Stack Developer*

*Jan 2025–Present*

- Built a personal finance platform including a web app using **Next.js** and a mobile app in development.
- Designed backend services using **Node.js and Express** with secure and scalable APIs.
- Implemented authentication, data management, and user dashboards.
- Deployed the platform to production and achieved early user validation.

## Technical Skills

---

**Frontend:** React, TypeScript, JavaScript, Next.js

**Backend:** Java, Node.js, Express.js, REST APIs

**Mobile:** React Native

**Databases:** MongoDB, SQL

**Cloud & DevOps:** AWS (basic), CI/CD, Git

**Testing:** Cypress (E2E)

**Architecture:** UI Architecture, Scalable Systems Design, Performance Optimization, Secure Development
